

DRUM LAMPSHADE MAKING WORKSHOP

DURATION 2.5 HRS

What does the course involve?

By the end of this workshop you will have produced a professionally finished 30 cm diameter drum lampshade. The workshop will involve applying a fire retardant backing to your fabric of choice after which you will cut, prepare and apply the shade to a lamp frame. You may even have time to finish with braiding should you wish to bring any with you.

What do I need to bring?

All you need to bring is a 1/2 metre of fabric of your choice. Avoid fabrics that are too thick as this may be more difficult when finishing the edges. A cotton / linen fabric would be perfect for this project.

Are there any additional costs?

No, the kit and equipment is included
Your fabric will be the only extra cost

Additional information

Extra kits can be purchased on the day
A step by step sheet will be included for future reference

How to book

Bookings can be made upon completion of the registration and payment made via cheque or BAC.
